# FIRST get R

- Click on https://cran.rstudio.com/
- Select a link for your operating system. Most of you will either click:
  - Download R for (Mac) OS X
  - Download R for Windows

**Download and Install R**

Precompiled binary distributions of the base system and contributed packages, **Windows and Mac** users most likely want one of these versions of R:

- Download R for Linux
- Download R for (Mac) OS X
- Download R for Windows

R is part of many Linux distributions, you should check with your Linux package management system in addition to the link above.

- Then,
  - **for Macs**, select: R-#.#.#.pkg *(online "#" represents an actual number, e.g., R-4.0.3.pkg)*

| | |
|---|---|
| R-4.0.3.pkg (notarized and signed)<br>SHA1-hash: 8402f586aef1fdb12c6e34c73b286f87318fb1be<br>(ca. 85MB) | **R 4.0.3** binary for macOS 10.13 (High Sierra) and higher, signed and notarized package. Contains R 4.0.3 framework, R.app GUI 1.73 in 64-bit for Intel Macs, Tcl/Tk 8.6.6 X11 libraries and Texinfo 6.7. The latter two components are optional and can be ommitted when choosing "custom install", they are only needed if you want to use the `tcltk` R package or build package documentation from sources. |

  - **for PCs**, select base then click Download R #.#.# for Windows

Subdirectories:

| | |
|---|---|
| base | Binaries for base distribution. This is what you want to **install R for the first time**. |
| contrib | Binaries of contributed CRAN packages (for R >= 2.13.x; managed by Uwe Ligges). There is also information on third party software available for CRAN Windows services and corresponding environment and make variables. |
| old contrib | Binaries of contributed CRAN packages for outdated versions of R (for R < 2.13.x; managed by Uwe Ligges). |
| Rtools | Tools to build R and R packages. This is what you want to build your own packages on Windows, or to build R itself. |

Download R 4.0.3 for Windows (85 megabytes, 32/64 bit)

Installation and other instructions

New features in this version

- Follow remaining instructions.

*Note, R should be stored where your other applications/programs are stored (e.g, Excel or Numbers). Often defaults in the instructions for downloading will do so automatically.*

# THEN Get RStudio

- Go to https://rstudio.com/products/rstudio/download/

Scroll down a little and Click on DOWNLOAD RSTUDIO FOR DESKTOP

- Click DOWNLOAD under the "Free" option

- Under "Installers" Click on the link for your operating system. Most of you will click either
  - RStudio #.#.### (e.g., 1.1.463)- Windows Vista/7/8/10
  - RStudio #.#.### - Mac OS X 10.6+ (64-bit)

- Follow instructions from there

*Again, note that RStudio should be stored where your other applications are stored. Often defaults in the downloading instructions will store Rstudio in the right place.*
